

Murtadha Al-Sharuee

AI Engineer / Machine Learning Engineer (NLP & MLOps)

Baghdad, Iraq / Australia | mortezaalshra@yahoo.com |

linkedin.com/in/murtadha-al-sharuee

Professional Summary

AI Engineer with 6+ years of experience across machine learning, NLP, and data engineering, with strong hands-on delivery in Azure-based platforms. PhD in Computer Science (text analysis) with published research in sentiment analysis and clustering. Experienced in building ML-ready data pipelines, integrating LLM/GenAI capabilities, and enabling production deployment through scalable, maintainable systems.

Core Skills

AI/ML: Machine Learning, Clustering, Ensemble Methods, XGBoost, Model Evaluation

NLP/LLMs: Sentiment Analysis, Text Classification, BERT, ULMFiT, VADER, Azure OpenAI API

MLOps: ML pipelines, data validation, model versioning, deployment enablement

Programming: Python, SQL, Java

Data/Big Data: Pandas, Scikit-learn, Spark, PySpark, Databricks

Cloud: Azure (Data Factory, Databricks, Azure ML), AWS

Tools: Git/GitHub, Flask, Selenium, BeautifulSoup

Professional Experience

Lecturer

Nov 2024 – Present

AL-Iraqia University, Baghdad

- Designed and delivered course content; supervised projects and mentored students in software and data-related subjects.
- Contributed to research and department goals while maintaining high teaching quality.

Senior Associate Consultant

Aug 2021 – Aug 2025

Infosys Limited, Australia

- Collaborated with cross-functional teams to design and deliver data/AI solutions aligned with business requirements.
- Supported cloud and data initiatives with focus on reliability, maintainability, and delivery.

Data Platform Engineer (AI/ML Ops Focus)

Jun 2023 – Nov 2024

Telstra (via Infosys), Australia

- Migrated legacy analytics/data workflows (e.g., Alteryx, Oracle) into Azure, enabling scalable ML-ready data foundations.
- Designed and managed data pipelines using Azure Data Factory and Databricks/Spark for integration and transformation.
- Integrated Azure OpenAI API to automate data validation and AI-assisted processing to improve data quality and speed.
- Worked with stakeholders to translate requirements into robust solution designs supporting analytics and ML use cases.

Data Engineer

Jun 2022 – Sep 2022

NBN, Melbourne, Australia

- Supported migration from Presto to Zetaris; executed complex SQL and automated data preparation in Python.
- Used big data tooling (Spark/Presto) for analysis and cleansing; optimized pipelines for reliability and cost.

Data Scientist / Team Lead (Volunteer)

Sep 2020 – May 2021

Isgood.ai, Australia

- Led development of an NLP platform focused on quality, stability, and cost.
- Built core AI functionality using Python and pre-trained models; delivered via Flask and deployed on AWS.
- Managed Git/GitHub workflows for collaborative development and model iteration.

Teaching Assistant

Aug 2018 – Jun 2021

La Trobe University, Australia

- Assisted teaching across programming and cloud/web topics; supported students with labs and guidance.

Selected AI Projects

- BERT:** Fine-tuning and experimentation for text classification / sentiment tasks (transfer learning).
- ULMFiT:** Transfer learning workflows for NLP classification and domain adaptation experiments.
- NLP Data Collection:** Python scrapers using Selenium/BeautifulSoup to collect platform-specific text data.

- **ACAEC (PhD)**: Novel contextual analysis + ensemble clustering approach implemented in Java; evaluated with Python/MATLAB/R.

Education

Graduate Certificate in Higher Education Curriculum, Teaching and Learning La Trobe University, Australia	Jul 2020 – Jul 2021
PhD in Computer Science La Trobe University, Australia	Feb 2014 – Sep 2019
Thesis: Dynamic Sentiment Analysis Using an Automatic Contextual Analysis and Ensemble Clustering Approach (ACAEC)	
Master of Computer Science BAMU, India	Aug 2008 – Jun 2010
Bachelor of Computer Science Al Mustansiriya University, Iraq	Jun 2003 – Jun 2007

Certifications

AI for Everyone; Azure Fundamentals; Version Control with GitHub; Python Essential Training; NLP: Twitter Sentiment Analysis; Transfer Learning for NLP & TensorFlow; Bash Shell Scripting; Communication and Leadership courses
